The New York City Progress Report Young Adult Borough Center 2010-11

Updated: December 20th, 2011

For citywide results and more information see:
<http://schools.nyc.gov/ProgressReport>

For a list of changes since 2009-10 see:
<http://schools.nyc.gov/ProgressReport/#changes>

Overview

The Progress Report is an important part of the New York City Department of Education's (DOE's) efforts to set expectations for educational programs Citywide and to promote program empowerment and accountability. The report is designed to encourage program leaders and teachers to accelerate academic achievement toward the goal of career and college readiness for all students. By tracking student academic progress, identifying steps to improve each student's learning, planning a course of action to achieve that improvement, and revising the course of action as needed to ensure progress, our programs can ensure that every student leaves the program prepared for the next step in his or her education.

The report also enables students, parents, and the public to hold the DOE and its programs accountable for student outcomes and improvement. It is a tool that, along with other information, can assist parents and students in choosing a program.

Progress Reports are issued annually near the start of the program year. Each Progress Report is intended to be a one-year snapshot of a program's performance: the methodology has evolved over time to account for feedback from programs and the community, changes in state policy, and higher standards for New York City programs.

Progress Report Grade

The Progress Report letter grade (A through F) provides an overall assessment of the program's contribution to student learning in four main areas of measurement: (I) Student Progress, (II) Student Performance, (III) School Environment, and (IV) Closing the Achievement Gap.

The overall Progress Report Grade is designed to reflect each program's contribution to student achievement, no matter where each child begins his or her journey to career and college readiness. The methods are designed to be demographically neutral so that the final score for each program has as little

correlation as possible with incoming student characteristics such as poverty, ethnicity, disabilities, and English learner status. To achieve this, the Progress Report emphasizes year-to-year progress and awards additional credit based on exemplary progress with high-need student groups.

Definitions

School Type

For purposes of the Progress Report, schools are divided into one or more of eight school types, based on the grade levels and students they serve: (1) Early Childhood schools (2) Elementary schools, (3) K–8 schools, (4) Middle schools, (5) District 75 schools, (6) High schools, (7) High School Transfer schools, (8) Young Adult Borough Center programs. The following table describes the schools that fall into each category:

Progress Report School Type	Grades and Students Served
Early childhood schools	K-2, K-3
Elementary schools	K-4, K-5, K-6
K-8 schools*	K-7, K-8, and K-12 (minus grades 9-12)
Middle schools	5-8, 6-8, and 6-12 (minus grades 9-12)
District 75 schools	K-8, focused on students with disabilities
High schools	9-12, K-12 (minus grades K-8), 6-12 (minus grades 6-8)
High School Transfer schools	9-12, focused on overage and under-credited students
Young Adult Borough Center (YABC) programs	9-12, focused on overage and under-credited students

* If a new K-8 school has grade 6, but does not yet have grades 3 or 4 it will be considered a middle school until it adds one of those grades.

A school that serves grades 6-12 (or K-12) will receive two separate Progress Reports with two separate grades: one for high school and one for the middle (or K-8) school. In those cases, the first report is based on the students in grades K-8 only and the high school report is based on the students in grades 9-12 only.

This document details the rules for evaluating Young Adult Borough Centers. There are separate Educator’s Guides for the other school types.

Minimum N (Number of Students)

The minimum number of values used for all reported calculations at the program level is 15. Elements for which there are fewer than 15 valid observations at a program are not included because of confidentiality considerations and the unreliability of measurements based on small numbers. Elements for which there are fewer than 15 valid observations are represented on the Progress Reports with the symbol “–”.

The additional credit metrics based on the weighted diploma rate have a minimum N of 10 students.

Year in High School / Cohort Letter

Most accountability measures in YABCs are based on each student’s “year in high school.” This is determined by the amount of time passed since the student’s ninth grade entry year. The ninth grade entry year is the first school year when a student enters ninth grade (or the equivalent) anywhere in the world. That year is referred to as “year one of high school.” The next school year is the second year of high school and so on. The year in high school often corresponds to the grade level, but not always. For example, a student who is repeating ninth grade is still a second year student. If this student drops out during the second year, the next year is still their third year even if they are not in school.

A group of students in the same year in high school are referred to as a “cohort” and each cohort is assigned a letter of the alphabet:

<i>Year in high school during 2010-11</i>	<i>Cohort Letter</i>	<i>Ninth Grade Entry School Year</i>	<i>“Class of” designation</i>
First	P	2010-11	Class of 2014
Second	O	2009-10	Class of 2013
Third	N	2008-09	Class of 2012
Fourth	M	2007-08	Class of 2011
Fifth	L	2006-07	Class of 2010
Sixth	K	2005-06	Class of 2009

Overage/Under-credited

Students designated as overage/under-credited (OA/UC) are considered to be two or more years behind his or her expected age and credit accumulation at the time of entry into a YABC.

The 2010-11 YABC Progress Report uses the following distinctions for OA/UC students:

<i>Age</i>	<i>Credits</i>
17	Less than 22 credits
18	Less than 33 credits
19-21	Less than 44 credits

Most at Risk

Among OA/UC students, we have identified a group that is even more at risk of not graduating. This is the subset of OA/UC students who meet the following criteria at the time of entry into a YABC:

<i>Age</i>	<i>Credits</i>
18	Less than 22 credits
19-21	Less than 33 credits

Progress Report Sections

A Progress Report grade of A, B, C, D, or F is assigned to each program based on the sum of scores in three main sections plus any additional credit the program obtains based on exemplary student outcomes. The sections are:

I. Student Progress (60 points): measures the ability of a program to help students progress toward the eventual goal of earning a Regents Diploma. The measure focuses on the capacities students develop as a result of attending the program, not the capacities they bring with them on the first day. Attention is given to all students in each school and particular emphasis is given to overage and under-credited students.

II. Student Performance (25 points): measures the percentage of students at a program who have graduated within six years, with emphasis on the number of students graduating with the Regents Diploma that State law now establishes as the goal for all students.

III. School Environment (15 points): measures pre-conditions for learning: crucial aspects of the program's environment, such as high expectations, engagement, safety, respect, and communication. Aspects of program environment are measured by surveys of parents, students, and teachers. The survey metrics count for 15 points (3.75 points for each of the four survey metrics).

IV. Closing the Achievement Gap (up to 14 points): awards credit to programs that achieve exemplary outcomes among high-need students. This component of the score can only improve a program's overall Progress Report Score. It cannot lower a program's score.

The picture below shows the cover page of the High School Progress Report:

NYC Department of Education
Dennis M. Walcott, Chancellor

Progress Report 2010-11

SampleHsSchoolName

PRINCIPAL: SampleHsPrincipalName

DBN: 992999
ENROLLMENT: 475
SCHOOL TYPE: High School
PEER INDEX: 2.34
(see p. 7 for more details on peer index)

OVERALL GRADE: **A**

OVERALL SCORE: **77.0** out of 100

PERCENTILE RANK: **88**
This school's overall score is greater than or equal to that of 88 percent of High Schools.

Overall Grades - High School	
GRADE	SCORE RANGE
A	70.0 or higher
B	58.0 - 69.9
C	47.0 - 57.9
D	40.0 - 46.9
F	39.9 or lower

For High schools, grades are based on cut scores determined prior to the release of the Progress Report. Further, schools with a four year graduation rate in the top third citywide cannot receive a grade lower than a C.

Overview

Each school's Progress Report (1) measures student year-to-year progress, (2) compares the school to peer schools and (3) rewards success in moving all children forward, especially children with the greatest needs. Strong Progress Report results are the basis for monetary rewards for school leaders, and poor results are an important factor in determining whether schools require intensive support or intervention. For more information, see schools.nyc.gov/community/planning/SupportandIntervention.htm.

CATEGORY	SCORE	GRADE	DESCRIPTION
Student Progress	40.5 out of 60	B	Student Progress measures the annual progress students make toward meeting the state's graduation requirements by earning course credits and passing state Regents exams.
Student Performance	18.7 out of 25	A	Student Performance measures how many students graduated within 4 and 6 years of starting high school, and the types of diplomas they earned.
School Environment	12.8 out of 15		School Environment measures student attendance and a survey of the school community rating academic expectations, safety and respect, communication, and engagement.
Closing the Achievement Gap	5.0 (14 max)		Schools receive additional credit for exceptional graduation and/or Regents outcomes by students with disabilities, English Language Learners, and students who enter high school at the lowest performance level.
Overall Score	77.0 out of 100	A	The overall grade is based on the total of all scores above, including additional credit for closing the achievement gap. Category scores may not add up to total score because of rounding.

Performance over time

Percentile rank of this school's overall Progress Report score for the past three years:

Year	Percentile Rank
2009	95
2010	75
2011	88

The Progress Report is a one-year snapshot of a school's performance. The Progress Report methodology has evolved over time, in response to school and community feedback, changes in state policy, and higher standards. For a description of methodology changes, visit schools.nyc.gov/ProgressReport.

Other accountability measures

These measures are separate from the Progress Report, and are an important part of school accountability in New York City and State.

Quality Review
The school's most recent Quality Review Score: **Well Developed** (2007-08)

State Accountability
The school's current status: **In Good Standing** (2010-11)

The Quality Review is an observational evaluation conducted by an experienced educator, focused on how well a school is organized to educate its students.

This status is determined by the New York State Department of Education under the No Child Left Behind Act.

Progress Report Metrics

Progress Reports include the following metrics:

I. Student Progress (60 points)

Attribution of students for Progress Section

For the YABC progress report, students who are continuously accountable in the NYC DOE from October 31, 2010 through June 30, 2011 are attributed to the last diploma granting school responsible as of June 30, 2011.

A student is considered continuously accountable for the year if he or she is active (i.e. enrolled) in one or more NYC DOE schools or programs on every day from October 31 through June 30. Students who receive a cohort-removing discharge (see p.9) during the period are non-accountable for the year. Students who enter the DOE for the first time or who return from a cohort-removing discharge during the period are also non-accountable.

Students who graduate mid-year remain accountable for the remainder of that program year only. Students who are discharged with anything other than a cohort-removing discharge or graduation are considered dropped out. Dropped out students remain accountable for one year, or until the end of their sixth year of high school, whichever comes first. Students in non-diploma granting programs such as GED, home/hospital instruction, or programs for incarcerated students are accountable for the same time period as dropped out students.

For the YABC Progress Report only, YABC programs are treated as if they were diploma granting for the purposes of determining which school or program is accountable. So, if a student transfers from one YABC program to another before June 30, only the second program is accountable.

On the other hand, YABC programs are not diploma-granting. When a student completes the graduation requirements at a YABC

program, the program discharges the student back to the sending school for graduation. For purposes of the YABC Progress Report, if the student goes from a regular high school to a YABC then back to the same regular high school, then the YABC is still considered accountable as long as the second enrollment at the regular high school is 75 days or less.

I.1-4 Average Credits Earned Per Year by Credits Accumulated at the Beginning of the School Year

1. 0.00 – 22.00 Credits
2. 22.01 – 33.00 Credits
3. 33.01 – 38.00 Credits

These measures evaluate the average credits earned per year for students with different credits at the start of the year. The point values for these three measures are assigned proportionately based on the number of students in each credit category.

Students who start the year with more than 38 credits are excluded from these measures as the relevant measure for these students is graduation. NYSAA-eligible students are excluded from this measure. Students who start the year with 38 credits or less and graduate mid-year contribute 0.5 to the denominator of this metric.

I.5 Average Change in Student Attendance

This measure presents a program's average change in student attendance from 2009-10 to 2010-11. This measure looks at two pieces of information for each student:

- Student's attendance rate for 2009-10 (note: the student's attendance rate would be the aggregate rate for any New York City public school(s) the student attended in 2009-10)
- Student's attendance rate for 2010-11 (note the student's attendance rate would only include the rate for the program under evaluation)

To be included in this measure a student must have an attendance

rate for the 2009-10 program year with a minimum aggregate of 40 days on register at any New York City school(s) during that year. Additionally, at the program under evaluation during the 2010-11 program year, he must have been on that program's register for a minimum of 40 days.

Change in the yearly attendance rate for each program is calculated by taking the average of change in attendance rate from 2009-10 to 2010-11 for all students at the program under evaluation.

1.6-10 Weighted Regents Pass Rates

On a Citywide basis, students' entering proficiency, as measured by their performance on State 8th grade subject tests, is highly predictive of their likelihood of passing the high school Regents exams. These measures evaluate the extent to which some YABCs help their students meet or exceed these expectations, while students attending other YABCs fall below expectations.

Each student has a possible weight for each exam. These weights are based on the performance decile in the corresponding 8th grade test. Where a student's average 8th grade proficiency is not available, a student's demographic characteristics are used as a proxy to predict his likelihood of passing the high school Regents exams. The tables of weights can be found in the appendix.

Students who are less likely to pass the exam are weighted to contribute more points to this metric. If only one in five students with Student A's entering proficiency is expected, based on prior experience of all City students, to pass a subject Regents test, then that student's weight on that Regents is five. If one in two students with Student B's entering proficiency passed the Regents, then that student's subject weight is two. When Student A passed the Regents with 65 or higher, he would contribute five to his program's weighted Regents pass rate. When Student B passed with 65 or higher, he would contribute two.

There are ten Regents exams that count toward the weighted Regents pass rate, divided into five subjects:

Subject	Exam
English	English
U.S. History	U.S. History
Global History	Global History
Science	Living Environment
	Earth Science
	Chemistry
	Physics
Math	Integrated Algebra
	Geometry
	Algebra II

Each of these exams has the potential to count toward the metric. However, every exam taken does not necessarily count toward the metric. The rules for including and excluding exams for weighted Regents pass rate are:

General Rules for including / excluding exams

- Only exams taken in January, June, or August 2011 can be included in the 2010-11 weighted Regents pass rate. Only each student's highest score in the year is considered.
- All exams are attributed to the program where the student was registered on October 31st, 2010
- Regents with a score of ABS (absent) do not count toward weighted Regents pass rate
- Regents Competency Tests (RCTs) are excluded from weighted Regents pass rate

Rules for including / excluding exams passed in 2010-11

- The exam is included if it is the first time the student passed the exam
- The exam is excluded if the student has already passed the same exam at an earlier date

Rules for including / excluding exams failed in 2010-11

- Failures are excluded if the student passed or passes any exam in the same subject (or the same exam) either in the same year or a previous year
- If there are multiple failures by the same student in the same year in the same subject, then a maximum of one of the failed exams will be included

Examples:

If a student passed Integrated Algebra in 9th grade then attempts the Geometry Regents in 10th grade, the exam is included if the student passes and excluded if the student fails.

If a student scores 70 on Integrated Algebra one year and tries it again in the next year to get an 80, the exam is excluded from weighted Regents pass rate in any case but it can still contribute to the College Readiness Index.

If a student passes both Integrated Algebra and Geometry for the first time in the same year, both exams are included.

If a student fails algebra twice, fails geometry twice, then passes algebra in the summer of the same year, only the passing exam is included and all four failed exams are excluded.

If a student who has never passed algebra fails it three times in the same year, one failed exam is included and the other two are excluded.

1.11 Average Completion Rate for Remaining Regents

This measure evaluates a program's ability to help students progress each year toward passing the five Regents subject tests required for a Regents diploma: English, Math, Science, U.S. History, and Global History. This metric applies to students in years two, three, four, five, and six of high school. Usually, YABC programs only serve students in years five or later.

In this metric, each "subject" (i.e. graduation requirement) is considered separately. So, for example, a student who passes both Algebra and Geometry has only passed one subject since both of these exams fall under the math requirement. A student who has passed both U.S. History and Global History counts as having passed two "subjects" since each of those is a separate requirement for graduation.

The metric value for the program is the sum of the total number of "passed" subjects (the numerator) divided by the total number of "needed" subjects (the denominator).

The denominator contribution (exams needed) is the total number of subjects not passed as of the beginning of 2010-11. The numerator (exams passed) is the total number of needed subjects passed in 2010-11.

On Regents exams, the required passing score for all students in all exams is 65 or higher. Scores of "PR" on component exams are considered passing. RCT exams in the corresponding subject are also considered passing. Subjects with Regents waivers ("WA") are excluded from the numerator and denominator unless the student actually takes an exam in that subject.

Exams that are failed have no impact on this metric. Since the denominator is based on the needed exams for the entire cohort, failing a needed exam counts the same as having never taken it. Students who are dropped out or in non-diploma granting programs do contribute. NYSAA-eligible students are excluded. Programs with a waiver from the state to use portfolio assessments instead of some Regents exams do not get values in this metric.

II. Student Performance (25 points)

6-Year Graduation Cohort

Attribution of students for Performance Section (Graduation)

Graduation attribution uses a separate system from the Student Progress section. Students are attributed to the last diploma-granting school as of June 30 of the sixth year of high school. In keeping with state/federal graduation reporting rules, continuous enrollment is not necessary. Any student enrolled for one or more days (including no-shows) are accountable if their enrollment represents the last diploma-granting school before June 30 of the fourth year of high school.

For the 2010-11 Progress Report, a school's 6-year graduation cohort consists of all students who:

- Are assigned to the 2005 Cohort Year (this cohort is represented by the letter 'K'), and
- Were not discharged with a cohort-removing code prior to June 30, 2011, and are accountable for graduation to the program because
 - The program was the last YABC or diploma-granting program accountable as of June 30th, 2011
 - The last record indicates a graduation discharge that resulted within 75 days of the YABC returning the student to the sending school

There are circumstances under which a discharged student can become non-accountable. Dropped out students and non-diploma granting program students still contribute toward the graduation rate denominator when his or her cohort reaches expected graduation. If the student leaves school for one of the reasons below before June 30 of year six then the student will become non-accountable if all required documentation is collected and stored on file. For more information about discharges, please see the [Transfer Discharge](#)

[Guidelines.](#)

Potentially Cohort-Removing Discharge Codes:

Code	Description
06	Admitted to NYC parochial school with documentation
08	Admitted to NYC private school with documentation
10	Placed in juvenile justice or similar institution (non-DOE)
11	Transferred to a school outside of NYC with documentation
15	Deceased
20	Early admission to a four year university
25	Already received a high school diploma outside DOE at time of enrollment

The Student Performance measures focus on the program's success in graduating its students and advanced diploma achievement.

II.1 Six-Year Graduation Rate

This measure reflects the percentage of students in the program's six-year cohort (defined above) that graduated with a Regents or Local Diploma, including August graduates. For the 2010-11 Progress Report, the six-year cohort reflects the 'K' cohort which includes students who first entered high school during the 2005-06 school year. This cohort can be viewed in ATS using the command RGCS.

II.2 Six-Year Weighted Diploma Rate

This measure assigns a weight to each type of diploma based on the relative level of proficiency and college readiness indicated by the diploma type. GEDs and IEP Diplomas, both of which are not included in the non-weighted graduation rates, can contribute to this measure. GEDs can contribute to this measure for any student, but IEP diplomas are only counted for students eligible for NYSAA (i.e. those that are exempt from Regents and RCTs). Non-NYSAA eligible students with IEP diplomas are considered non-graduates (0.0 points). The base weights are as follows:

<i>Diploma Type</i>	<i>Diploma Weight</i>	<i>With CTE-Endorsed Diploma</i>	<i>With Advanced Designation in Arts</i>	<i>With Associate's Degree</i>
GED	0.5	NA	NA	NA
IEP	1.0 (NYSAA only)	NA	NA	NA
Local	1.0	1.5	NA	1.5
Regents	2.0	2.5	2.5	2.5
Advanced Regents	2.5	3.0	3.0	3.0
Advanced Regents with Honors	3.0	3.0	3.0	3.0

The diploma weights in the shaded boxes above can also be multiplied based on certain demographic variables:

<i>Demographic Characteristic</i>	<i>Diploma Weight Multiplier (except for GED and IEP diplomas)</i>
Overage/Under-credited at YABC entry	x2
Most at Risk at YABC entry	x4
Students with Disabilities: SETSS	x2
Students with Disabilities: Team Teaching (CTT)	x3
Student with Disabilities: Self-Contained	x4

For example, a CTT student who receives an Advanced Regents Diploma has a total weight of 7.5 (2.5 x 3).

If a student meets the criteria for more than one multiplier, only the highest multiplier is used. So, a student who is both CTT and overage would have a total multiplier of x3 (not x6). Students with

disabilities who receive only related services do not receive a multiplier on their diploma weight.

A student's special education adjustment will be the most restrictive placement in the last seven school years.

The weighted diploma rate for the program is the average of the all the individual diploma weights (non-graduates contribute 0.0). The six-year weighted diploma rate evaluates the same cohort of students as the six-year graduation rate.

II.3 Six-Year Graduation Rate by Credits at Admission

1. 0.00 – 22.00 Credits
2. 22.01 – 33.00 Credits
3. More than 33 Credits

This measure is similar to the six-year graduation rate, except that it differentiates separately evaluates students who enter a YABC with different credit amounts. The point values for these three measures are assigned proportionately based on the number of students in each credit category.

III. School Environment (15 points)

Four measures in the School Environment section come from the results of the NYC School Survey.

The NYC School Survey is administered yearly to parents, teachers, and students in 6th grade and older. The survey gathers information on how well each program creates an environment conducive to student learning from these key members of program communities. Each survey question informs program results in one of four categories.

III.1 Academic Expectations

This survey domain measures the degree to which a program encourages students to do their best and develop rigorous and

meaningful academic goals. Expectations are communicated in direct and subtle ways, and are powerful motivators of student behaviors and performance. Programs with high expectations provide a learning environment in which students believe they are capable of academic success.

III.2 Communication

This survey domain measures the degree to which a program effectively communicates its educational goals and requirements, listens to community members, and provides appropriate feedback on each student's learning outcomes. Access to this information can be used to establish a greater degree of agency and responsibility for student learning by all community members.

III.3 Engagement

This survey domain measures the degree to which a program involves students, parents and educators in a partnership to promote student learning. Programs with a broad range of curricular offerings, activities, and opportunities for parents, teachers and students to influence the direction of the program are better able to meet the learning needs of children.

III.4 Safety and Respect

This survey domain measures the degree to which a program provides a physically and emotionally secure environment for learning. Students who feel safe are more able to engage in academic work and less likely to behave in ways that interfere with academic performance.

Each program receives a score for each question on the parent, teacher, and student surveys. Each question is linked to one of the four domains. Question scores are combined to form domain scores on a 0 to 10 scale, which appear on the Progress Report. Domain scores by respondent groups question scores, and percentage of respondents selecting each answer choice is reported separately on the Survey Report. Survey Reports are available at each program's website. For additional information about the survey and its scoring

methodology, please visit <http://schools.nyc.gov/surveys> or email surveys@schools.nyc.gov.

IV. Closing the Achievement Gap

Programs receive additional credit if the percentage of high need students who make exceptional gains is greater than or equal to the cut scores for each metric. Specifically, a program earns 2.0 points for each measure in which the program's percentage of qualifying students making exemplary gains places it in the top 20% of all programs of the same program type, and a program earns 1.0 point for each measure in which the program's percentage of qualifying students places it in the top 40% but not the top 20%. The percentage of students in each category making exceptional gains is indicated on the Progress Report along with the cut-offs for the top 20% and top 40% and the number of points earned. Categories in which the program has fewer than the minimum number of students are represented with the symbol "--".

IV.1 Six-Year Weighted Diploma Rate for English Language Learners

IV.2 Six-Year Weighted Diploma Rate for Students with Disabilities

IV.3 Six-Year Weighted Diploma Rate for Overage / Under-credited Students

IV.4 Six-Year Weighted Diploma Rate for Overage / Under-credited Black and Hispanic males

These metrics are calculated in the same way as Six-Year Weighted Diploma Rate in the Student Performance category. The difference is that each metric is limited to students in each of the specified groups.

For the purposes of additional credit, students are included in the Students with Disabilities group if their CAP program code indicates a placement in self-contained, CTT, or SETSS in the last seven school years.

Any student identified as an English Language Learner for any of the last seven school years will be considered ELL on the Progress Report.

IV.5 Overage / Under-credited Regents - ELA

IV.6 Overage / Under-credited Regents - Math

These metrics evaluate the percentage of OA/UC students that pass the specified Regents exam with a 75 or higher. Students who have previously passed the exam with a 75 or higher in that subject are excluded from the measure. Only OA/UC students who take that subject's Regents exam count toward the denominator.

IV.7 Credit for Moving Students with Disabilities to Less Restrictive Environments

This measure rewards programs that are successful in promoting the learning growth of their students with disabilities by moving them to more-inclusive settings. Students with an IEP during any of the last four school years are sorted into four tiers based on primary program recommendations and the amount of time spent with general education peers, as of the end of September of each year (see below). The denominator for this measure is the total number of students in the four tiers. The numerator contribution of each student is the highest tier number from the last four school years minus the tier number for 2010-11. This number can range from zero (for students who are in their highest tier in 2010-11) to three (for students who were previously in Tier Four and are in Tier One in 2010-11). Negative numbers are not possible which means that students who move to a more restrictive environment count the same as if they had always been in that setting.

Tier One – General education

- No IEP
- IEP with a recommendation of related services only

Tier Two – 80-100% of time with general education peers

- Primary recommendation of SETSS or CTT
- Primary recommendation of self-contained, spend 80-100% of instructional periods with general education peers

Tier Three – 40-79% of time with general education peers

- Primary recommendation of self-contained, spend 40-79% of instructional periods with general education peers

Tier Four – 0-39% of time with general education peers

- Primary recommendation of self-contained, spend 0-39% of instructional periods with general education peers

V. Phase-In Metrics

The following metrics will be reported, but not scored, in the 2010-11 Progress Report for YABCs, and will be incorporated as scored metrics in the 2011-12 Progress Report:

V.1. College Readiness Index

This metric is based on the percentage of students in the class of 2009 (cohort K) who have passed out of remedial coursework in accordance with City University of New York (CUNY) standards by:

- graduating with a Regents diploma, and
- earning a 75 or higher on the English Regents or score 480 or higher on the Critical Reading SAT, and
- earning an 80+ on one math Regents and completing coursework in Algebra II/Trigonometry or a higher-level math subject, or scoring 480 or higher on the Math SAT

A student can demonstrate completion of math coursework by: (1) passing a course in Algebra II/Trigonometry or higher and taking one of the following exams: the Math B Regents, Algebra II/Trigonometry Regents, AP Calculus, AP Statistics, or IB Math exam, or (2) passing the Math B or Algebra II/Trigonometry Regents.

V.2. College Enrollment Rate

This metric is based on the percentage of students in the class of 2008 (cohort J) who graduated and enrolled in a degree program at a two- or four-year college or university by December 31, 2010.

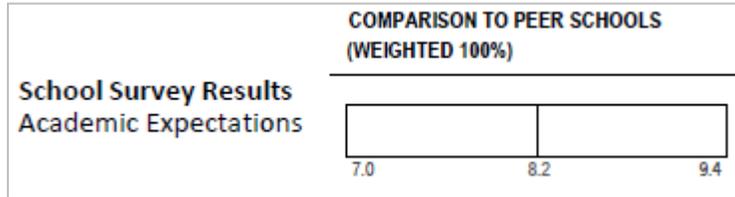

Progress Report Scores and Grades

I. Comparison Ranges

1.1 Peer Comparison Range

Each YABC is compared to all other YABCs. Each metric result for a program is compared to the historical results of the peer group from 2006-07 through 2009-10.

On the Progress Report, the peer comparison range consists of all possible results within two standard deviations of the average. It is displayed like this:

The number in the middle is the historical average (mean) metric value for the peer programs. The line near the middle of the bar represents the position of the average.

The highest value in the comparison range, referred to as 100% of the range, is calculated:

$$(\text{peer average}) + 2 \times \left(\frac{\text{peer standard deviation}}{\text{peer average}} \right) = 100\% \text{ of range}$$

In the example above:

$$8.2 + 2 \times 0.6 = 9.4$$

The lowest value in the comparison range, referred to as 0% of the range, is calculated:

$$(\text{peer average}) - 2 \times \left(\frac{\text{peer standard deviation}}{\text{peer average}} \right) = 0\% \text{ of range}$$

In the example:

$$8.2 - 2 \times 0.6 = 7.0$$

If the calculated peer range extends beyond what is theoretically possible, the range is cut off so that only the possible values are used. For example, if the average attendance for a peer group was 96% and the standard deviation was 3%, the peer range might extend up to 102%, which is impossible for a program to achieve. In that case, we would use 100% as the highest value in the range instead.

II. Metric Scores

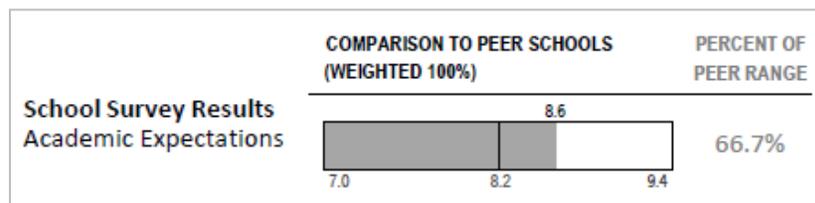

II.1 Percent of Peer Range

The percent of range indicates the share of the comparison range that is shaded, and can be used to determine how far above or below the historical average a program's 2010-11 result is, as follows:

Percent of Range	Interpretation
0%	Two or more standard deviations below average
25%	One standard deviation below average
50%	Equal to the average
75%	One standard deviation above average
100%	Two or more standard deviations above average

In general, the *percent of range* across the city for any metric forms a bell curve centered around 50%. However, this may not be true if (for example) the current year values are greater in general than the historical values or if the range is cut off by a theoretical maximum.

The percent of range is displayed like this on the Progress Report:

In this example, the program's result of 8.6 is over the historical average of 8.2. The bar is 66.7% shaded, which is determined by the following formula:

$$\frac{(\text{school's result}) - (0\% \text{ of range})}{(100\% \text{ of range}) - (0\% \text{ of range})} = \text{percent of range}$$

In this example:

$$\frac{8.6 - 7.0}{9.4 - 7.0} = 66.7\%$$

II.2 Number of Points Possible

For most programs, the possible number of points for each metric is:

Metric	Points Possible
Student Progress	60.00
Credits earned for students starting with:	24.00
1. 0-22.00 credits	
2. 22.01-33.00 credits	
3. 33.01-38.00 credits	
Average change in student attendance	12.00
Weighted Regents Pass Rate – English	4.00
Weighted Regents Pass Rate – Math	4.00
Weighted Regents Pass Rate – Science	4.00
Weighted Regents Pass Rate – U.S. History	4.00
Weighted Regents Pass Rate – Global History	4.00
Average Completion Rate for Remaining Regents	4.00
Student Performance	25.00
6-Year Graduation Rate	5.00
6-Year Weighted Diploma Rate	5.00
6-Year Graduation Rate by credits at transfer:	15.00
1. 0.00-22.00 credits	
2. 22.01-33.00 credits	
3. More than 33 credits	
School Environment	15.00
Academic Expectations	3.75
Communication	3.75
Engagement	3.75
Safety and Respect	3.75

In the Student Progress section for credit accumulation and Student Performance section for six-year graduation rate by credits at transfer, sections points are assigned in proportion to the number of students.

For example, if a program has 50 students in the first and third credit ranges, and 25 students in the second range, the calculation of points possible for each range would be:

Ranges with 50 students:

$$24 \times \left(\frac{50}{50 + 25 + 50} \right) = 9.6$$

Range with 25 students:

$$24 \times \left(\frac{25}{50 + 25 + 50} \right) = 4.8$$

If a program is missing a particular metric due to having less than 15 students contributing, the possible points for the metric are redistributed evenly to the remaining metrics in the section. When the missing metric is in the Student Progress section, the points will be re-distributed evenly to all three areas of the progress section: attendance, credits, and Regents.

There are four cases where programs get no scores or grades on the Progress Report:

- Programs in their first year of operation
- Programs with less than 25 students contributing to the Student Progress section
- Programs designated for phase-out
- Programs lacking a graduating class

II.3 Number of Points Earned

The points earned for each metric is based on the percent of the peer ranges shaded, multiplied by the total possible points for the metric. On the Progress Report, the values are displayed like this:

PERCENT OF PEER RANGE	POINTS POSSIBLE	POINTS EARNED
66.7%	3.75	2.50

The *points earned* for each metric is:

$$\left(\frac{\text{percent of}}{\text{peer range}} \right) \times \left(\frac{\text{points}}{\text{possible}} \right)$$

So in the example above:

$$(0.667) \times (3.75) = 2.50$$

The points earned for each metric in a category are added together to get the category scores: Student Progress, Student Performance, and School Environment. The category scores, plus any additional credit are added together to get the overall score. A program's rank is also calculated comparing the program's overall score to all other YABCs.

III. Grades

Grades are assigned based on the cut score tables displayed next to each grade on the Progress Report. The 2010-11 YABC Progress Reports use the same cut scores as the 2009-10 Progress Reports.

The category grade cut scores are derived from the overall cut scores. For example, the cut-off for an A in the School Environment section is roughly 15% of the cut-off for an overall A; and the cut-off for a B in Student Performance is roughly 25% of the cut-off for an overall B.

Appendix: Decile Weights for Weighted Regents Pass Rate Measures

Decile weights are assigned to students based on their performance on the 8th grade New York State tests in ELA, science, social studies, and Math. Decile one represents students who scored in the bottom 10% of all students on the corresponding 8th grade test that year. Decile 10 represents students who scored in the top 10% of all students on the corresponding 8th grade test year.

Students without 8th grade New York State tests are assigned a “decile equivalent” based on their demographic characteristics:

<i>Demographic Characteristic</i>	<i>Weight</i>
Black / Hispanic	+1
Free Lunch	+1
Special Education	+2
English Language Learner	+2 (English Regents only)
Students with interrupted formal education (SIFE)	+1 (English Regents only)

A student’s weight is added to 11 to determine his “decile equivalent”. For example, a student who was Free Lunch eligible and an English Language Learner would have a weight of 3 for the ELA Regents, and thus his ELA decile equivalent would be 14 (11 + 3).

When a student passes a Regents exam, he receives the weight corresponding to this decile for that Regents subject. If a student fails a Regents exam, he receives a weight of zero for that Regents subject.

The decile weights themselves are the reciprocal of the historical pass rates during the years 2006 through 2010. For example, students in decile six attempted the Integrated Algebra Regents 38,778 times during that period. Of those attempts, 25,352 of them had passing scores. This gives a passing rate of $25,352 / 38,778 = 65.4\%$. The decile weight for Integrated Algebra decile 6 is the inverse of that: $1 / 65.4\% = 1.53$.

English and History Regents

<i>Decile*</i>	<i>English</i>	<i>U.S. History</i>	<i>Global History</i>
1	4.71	3.60	5.68
2	2.39	2.51	3.65
3	1.78	2.02	2.70
4	1.53	1.65	2.13
5	1.32	1.45	1.75
6	1.20	1.28	1.45
7	1.12	1.17	1.26
8	1.06	1.08	1.12
9	1.02	1.03	1.04
10	1.01	1.00	1.01
11	1.12	1.17	1.30
12	1.31	1.43	1.71
13	1.44	1.66	1.95
14	1.87	3.18	5.02
15	2.03	3.35	5.56
16	2.86	NA	NA
17	5.21	NA	NA
18	10.00	NA	NA

Math Regents

<i>Decile*</i>	<i>Integrated Algebra</i>	<i>Geometry</i>	<i>Algebra II</i>
1	12.99	20.00	20.00
2	6.89	15.00	17.50
3	4.64	10.04	13.52
4	2.94	6.10	10.95
5	2.09	4.21	7.58
6	1.50	2.89	5.43
7	1.24	2.00	3.34
8	1.09	1.48	2.33
9	1.03	1.18	1.61
10	1.00	1.04	1.14
11	1.35	1.26	1.41
12	1.91	1.88	1.84
13	2.58	2.83	2.95
14	5.22	5.38	5.50
15	9.41	10.00	10.00

Science Regents

<i>Decile*</i>	<i>Living Environment</i>	<i>Earth Science</i>	<i>Chemistry</i>	<i>Physics</i>
1	6.33	10.05	10.01	5.42
2	3.77	6.92	7.75	5.12
3	2.63	4.66	6.46	4.29
4	1.98	3.51	5.20	3.27
5	1.59	2.61	3.90	2.89
6	1.32	1.98	3.08	2.51
7	1.17	1.58	2.33	2.12
8	1.07	1.31	1.81	1.75
9	1.03	1.13	1.40	1.44
10	1.00	1.02	1.11	1.15
11	1.21	1.45	1.30	1.18
12	1.54	2.08	1.81	1.43
13	1.68	2.35	2.34	1.89
14	4.01	4.82	3.97	6.67
15	4.32	6.40	10.00	10.00
